How to Use Your *Creativity Oracle Cards*

Oracle cards are a wonderful way for people to learn to trust their intuition. The cards have images and phrases, digestible messages that will nurture, stimulate, guide, and inspire, and you can be creative and eventually invent your own way of working with them. Oracle cards and Tarot cards are similar in that they are both used for doing readings, gaining perspective, exploring oneself, and divining the future.

Our *Creativity Oracle Cards* system is easy enough for a beginner to use, yet insightful enough for a professional person or reader to gain new ways to improve their creative and intuitive techniques. It will help the user stay energized and inspired and motivated to keep going when the going gets tough.

Before you do your first reading, look through the deck, feasting your eyes on Amy's incredible tapestry art and reading the various messages. You will find many that you instinctively agree with and that you already affirm in your own life.

You will also find a few by which you are instantly disturbed, either because you believe they are unrealistic, are impossible to achieve, or require you to admit that you have not been living up to your potential.

Having this wide range of different feelings elicited by looking through the deck is perfectly normal and as it should be. Those of us who are desirous of personal growth are always working on areas of our lives and ourselves with which we are not satisfied. If one or more cards provoke within you a strong reaction, take a deep breath and give thanks to the Universe that you are wise enough and strong enough to be working on yours.

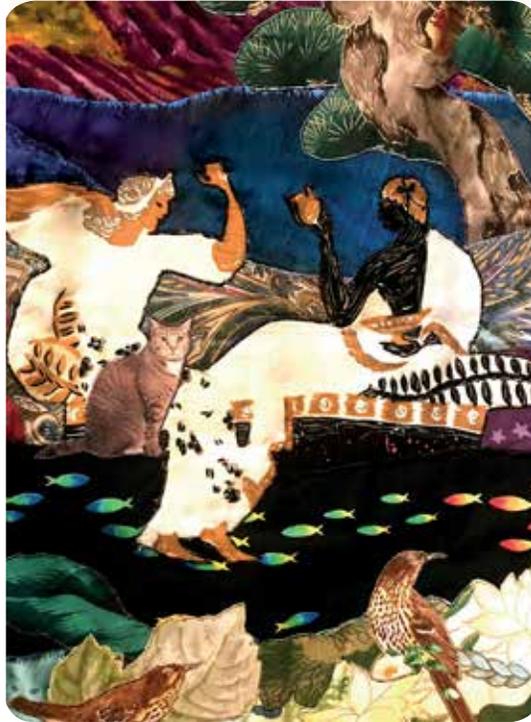

We recommend that you do not do sessions with another person until you are sure of how to use the system and have started to see the benefits derived

from doing so. After you reach that point you have the choice of using your deck of *Creativity Oracle Cards* either by yourself or with others whom you trust absolutely. No skeptics allowed. Ever.

Please be patient with yourself and with your creative process. You should repeat your affirmations and do your visualizations whenever you want to, but especially when you catch yourself thinking thoughts that you know work against your best interests.

Whether you have been looking to improve your self-esteem, trust your intuition, evolve your talents, make a living from your gifts, complete a project, hone your communication skills, reach a new level, know what next steps to take on your spiritual path, and create the best life possible for you, your *Creativity Oracle Cards* deck can be an important part of your campaign to achieve your goals.

3 SHARE

To help you make progress, it's a good idea to share what you have and what you care about.

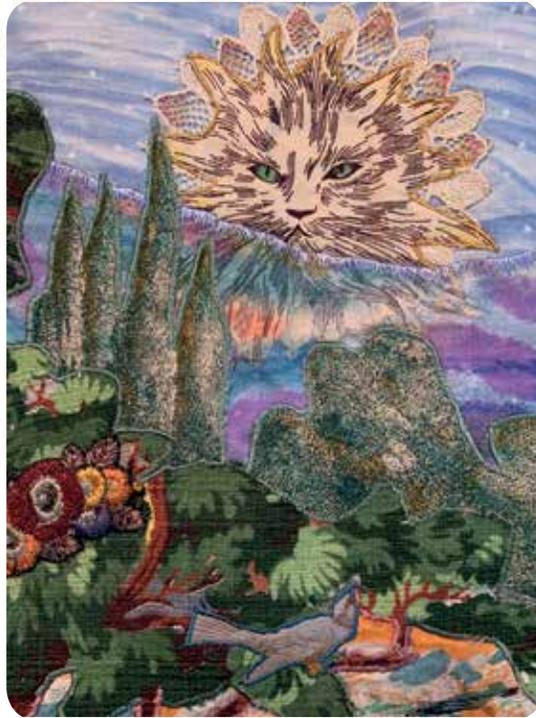

The SHARE card is an indication that at this point you should let someone know how you feel and what is going on with the situation in question. Your best interests would be served by sharing the challenge that you face with either one person or a collection of people who have the ability to give you advice based on solid principles and experience. Depending on your situation, this card can indicate you should share your glory or other reward you might receive for a creative project. This is for those who are using their creativity to formulate an idea or a financial entity in which investment is possible. If that is the case, it is time to offer shares of your creation to those with resources to invest.

4 RECYCLE

Learn from the past and apply it to creating your vision of the future.

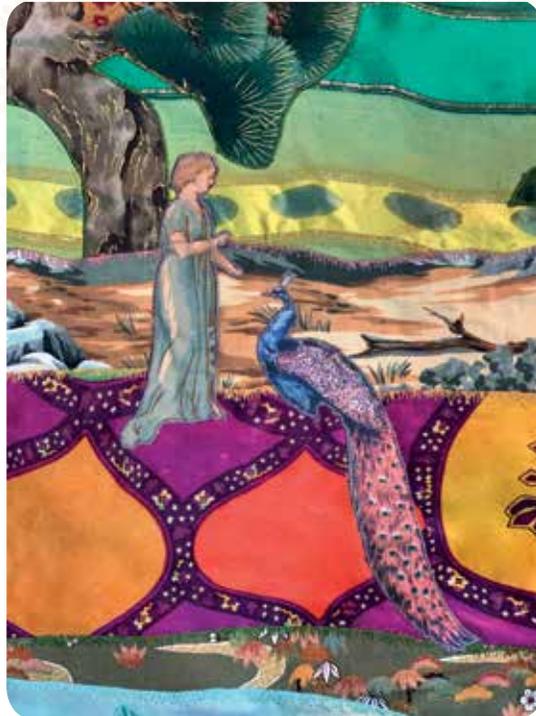

The RECYCLE card is an indication that it is time to apply to your current challenge an idea, technique, or material that you have used before. Make a beautiful collage out of seemingly disparate ideas or materials. What is to be recycled could have been used successfully in the past, but it is important to be open to the fact that in this case the opposite may be true. Something that in the past proved unsuitable for the purpose and was discarded could now be the perfect solution to your present challenge. It is also possible that the obvious meaning is the correct one and that you should use at least one recycled material in your creative project.

13 INNOVATION

Have fun and experiment, inventing something that surprises and has never existed before.

The INNOVATION card most often means that you are being called upon to use your creativity in a new and different way, to have fun crafting an inventive response to your challenge. It can also mean that your creation may be too similar to that of another person, or you have simply not been innovative enough in your approach. We all need to acquaint ourselves with the latest technology and methods if we want to "think outside the box." It is equally important to think outside your comfort zone. Although innovation is usually associated with the latest technology and progress, it can sometimes be beneficial to spend your time discovering and adapting new approaches to a problem. Bend and break the rules.

14 TRUST

Trust that you were born a creative being and have never stopped being one.

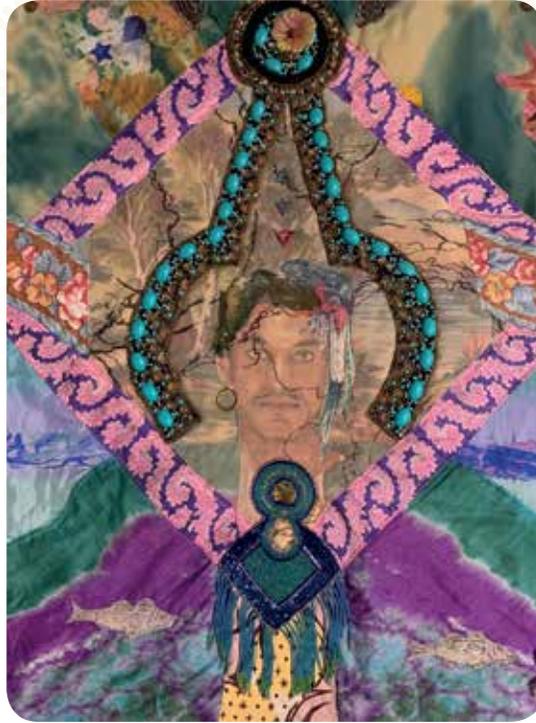

The TRUST card is an indication that you need to get to know all aspects of your situation so you can trust yourself, another person, or the creative process itself. It can also indicate that someone involved in the situation in question might have an issue trusting others, or, in rare instances, this other person might not be trustworthy. Relationships are built on trust. Since creativity most often involves doing things in a new and substantially different way, the lack of trust in any part of your plan practically guarantees that it will fail. Trust in one's abilities is often an issue when you are new to identifying yourself as a creative person. A record of accomplishments makes it easier to trust someone.

79 SUCCESS

**Enjoying your life and the unfolding of your creative abilities
as much as possible is real success.**

The SUCCESS card is an indication that you are dealing effectively with the goal that you want to attain, complete with any and all consequences. Be positive. Know that your project will turn out well. Good cheer, reward, happiness, and success will be yours. This card promises good fortune and achievements of all kinds if you stay grateful for all you have, including the degree of physical health you possess. Choose your battles carefully, and you will be successful. Dealing with disappointment is also vital if you want to be a success at . . . anything! We fail until we succeed. Paramahansa Yogananda taught, "The time of failure is the best time to sow the seeds for future successes." Show the world who you are and what you have done. Honor the success of all other people as you would have them honor you.

80 GO DEEPER

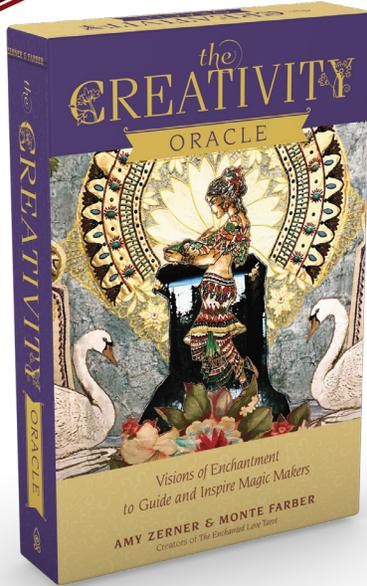

Expressing the deeper meanings in life, while staying attuned to childlike wonder, is at the heart of all great art.

The GO DEEPER card is an indication that you have not fully understood all you need to comprehend before you can take your creative process to where you want it to go. You have many messages and ideas that you want to reveal. Soul searching, study, and research will benefit you now. Go deeper into your intentions, focus your will, and plant the seeds of your heart's desire. Be your own hero. Face matters that need attention. The best way to fill the empty places inside us is with love and compassion for others and ourselves, and gratitude for what we have and have accomplished. Be relentless in your pursuit of truth and the more profound implications of whatever situation you are in. The creative journey often involves exploring concepts you thought you understood or were past—investigate to see deeper meanings and connections. Life is an exercise, a ritual we do to honor the Great Mystery!

From the authors:

Creativity is composed of equal parts intelligence, intuition, and heroism.

The Creativity Oracle

Visions of Enchantment to Guide & Inspire Magic Makers
Amy Zerner and Monte Farber

Husband-and-wife team Monte Farber and Amy Zerner devised this beautiful new oracle deck and guidebook for you—the magic makers, writers, artists, and craftspeople of the world—to empower you as a compass, an assistant, a prompt, an obstacle remover, a game changer, and a pathfinder. The inspiring principles in this divination system are designed to help stimulate the creative process and enable an imaginative and intuitive flow, while motivating and guiding your gifts and talents, whether you want to make your living doing what you love or to bring more fulfillment into your life. Each of the eighty cards is created from Amy's richly sewn tapestry collages, visions of enchantment that make every one of your oracle readings a work of art.

Monte Farber's profound writings offer inspiring guidance. Amy Zerner's exquisite art exudes her intuitive connection with archetypal stories. They've combined their deep love for one another to create bestselling books and oracles that have helped millions answer questions and follow their own spiritual paths.
